

At Towne Square Animal Clinic, we offer multiple appointment types to best serve our clients and their pets.

Traditional Appointments

For those clients who would prefer to stay with their pet and meet with the doctor face-to-face, we have many options throughout the day including early morning, late afternoon, and Saturday morning appointments.

Drop Off Appointments

We understand that our clients are busy and need more options than just traditional appointments. Drop-off appointments offer our clients the flexibility to drop off their pet in the morning between 7:00 and 9:00 AM. The pet is seen by the doctor during treatment and surgery hours. After being examined, a treatment plan is created and the pet can be picked up in the afternoon.

New Client and New Patient Appointments

Because we need extra time to examine and get to know you and your pet, we schedule an extra 10 minutes for any new client and/or patient. We ask that new clients and patients arrive 5 to 10 minutes early with health records, allowing us to begin the appointment on time.

Surgery Appointments

Surgeries and anesthetic procedures are scheduled Monday through Friday and are by appointment only. For surgery, all pets must be fasted (no food) after midnight the night before, and must be dropped off between 7:00 and 9:00 AM. Your pet will generally be discharged later that same day, usually between 4:00 and 6:00 PM.

New Puppy and Kitten Appointments:

When you bring a new puppy or kitten into your family, our staff will take the time to prepare you with all you need to know as a new pet owner. On your first visit, we include a full physical examination, intestinal parasite screening, and vaccinations as well as an extensive consultation about housebreaking/litter box training, address potential behavior issues, nutritional information, and preventive care needs.

Because we understand that our clients are busy, we are appointment only to avoid long wait times to see a doctor. We know that emergencies can happen at any time and we make them our priority when they occur. Please call ahead regarding emergencies. In more severe cases, we may refer you directly to an emergency hospital.
